Projects

Sparkle Wash [fronted](#) [backend](#) [live](#)
A full-stack car wash booking platform built with React, Express, and MongoDB.

- Implemented secure user authentication, service selection, and payment for booking confirmation
- Developed admin dashboard for real-time booking and service management.
- Integrated MongoDB for efficient slot and booking data handling.

Booke_E_Show [frontend](#) [backend](#) [live](#)
A full-stack e-commerce platform for buying books, built with React, Express, and MongoDB.

- Designed user-friendly interface for book browsing, cart management, and secure payments.
- Created admin features for managing books, user roles, and site functionality via a dashboard.
- Leveraged MongoDB for scalable book inventory and user data storage.
